Dix Bougies

Dix Bougies

^{EN} Dix Bougies by Studio Odile Decq is a contemporary chandelier with a strong reference to the past, featuring a rigorous and austere design, concealing a refined technological breakthrough. In a game of balance, the long horizontal extrusion and four other parts intersect in an asymmetrical and apparently random way, giving rise to an elegant composition. The LED light sources (10 in total) at the ends are enhanced by diffusers made of a sophisticated paper composed of cellulose and synthetic fibers that spread soft, decorative lighting into spaces, suggesting the glow of a candle from a distant past. Luceplan also presents a smaller version of this design, the new Dix Bougies petit, featuring 6 diffusers.

^{IT} Dix Bougies by Studio Odile Decq è un chandelier contemporaneo con un forte richiamo al passato, dal design rigoroso e austero che nasconde una raffinata tecnologia. In un calibrato gioco di equilibri, il lungo estruso orizzontale e altri quattro elementi si intersecano in modo asimmetrico e apparentemente casuale, dando vita ad un'elegante composizione. Le sorgenti luminose LED alle estremità (10 in totale) sono arricchite da diffusori costituiti da una sofisticata carta in cellulosa e fibre sintetiche che restituiscono agli ambienti una luce morbida e decorativa, evocando quella di una candela e di un tempo passato. Luceplan propone anche una nuova versione più piccola di questo design, la nuova Dix Bougies petit, con 6 diffusori.
